

Forklift Electrical Parts

Forklift Electrical Parts - Forklifts may be specifically labeled to be used in hazardous locations. A marked truck indicates the design has met the lowest standards of ANSI/UL 558 used for engine powered lift trucks or ANSI/UL 583 utilized for electric forklifts for the type of label put.

The use for labels for lift lift trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Ask your local insurance provider and Fire Marshall for additional info about the approved uses of industrial powered forklifts in your application.

If the particular forklift meets the outlined standards, labels could be put. A labeled forklift would show the type of designation placed on the nameplate and will have a properly corresponding label put.
